PROFILE

Full-stack web developer with more than 5 years of experience as a graphic designer. Effective at problem-solving and working in a fast-paced environment, while creating clean and documented code. Utilizes background as a graphic designer to create applications with detail-oriented, methodically-driven solutions. Currently finishing a Certificate in Full Stack Web Development from Monash University

PROJECTS AND APPLICATIONS

Bookbox | https://github.com/jamesthomasbester/Book_Box/tree/main | <https://handlebars-book-box.herokuapp.com/>

An e-commerce storefront which allows users to select and add books to a cart & checkout. Through their personal account creation they would be able to save their personal choices for future visits as well as favourites to serve as a wish list.

- **Role:** Front- end developer/ui/ux designer implementing visual elements that are visible from the computer users vantage point within a web application. You will combine the art of design with the science of programming.

Moviebox | <https://github.com/trietryannquyen/project-group-1> | <https://lniceth.github.io/Movie-Box/>

An app that allows the user to see reviews, trailers, ratings & related media of movies from the past, present and future.

- **Role:** Front- end developer/ui/ux designer implementing visual elements that are visible from the computer users vantage point within a web application. You will combine the art of design with the science of programming.

All rounder production employee | Aspace | present

- Loading programs into CNC machines.
- Entering initial settings (e.g. selecting parameters, positioning material and zeroing the machine).
- Monitoring machining operations.
